Georgia Institute of Technology (currently attending)
Master of Science in Computer Science

Kennesaw State University
Bachelor of Science, Biology

Experience

2015 - Present / Cox Automotive (Manheim)
→ Created REST services that updated 80 different legacy AS400s using technologies such as Spring Core, Spring Boot and/or Apache Camel.
→ Helped maintain, fix and enhance 68 web services, which use technologies/frameworks such as TIBCO and Apache Axis.
→ Enhanced and built web applications/services.
→ Made updates to a Spring Boot application with a frontend Angular 1 framework that managed user preferences.
→ Helped managed MySQL databases.
→ Built an internal tool using Node.JS and Angular 2 for uploading bulk user preferences for external clients.
→ Enhanced and built AWS pipelines using Groovy and Jenkins.
→ Worked with Docker containers for deploying to AWS.
→ Created an application that monitored GitHub repositories for commits then updated a database for service configurations. The application was built using Perl and YAML files.

2014 – 2015 / Accenture
→ Trained in Java and test-driven development.
→ Worked on functional and system testing for a large financial company.

2013 – 2014 / Gearbox Solutions
→ Built and integrated solutions using the FileMaker platform.
→ API integration with REST and SOAP over HTTP.
→ Plug-ins for FileMaker using Groovy.

2012 – 2013 / Danox Environmental Services, Inc.
→ Managed the pharmaceutical waste services department.

2009 – 2012 / Stericycle, Inc.
→ Ensured that DEA controlled substances were properly handled.
